

JENNIFER CEARNS

AI Anthropologist · TED Speaker · University Lecturer in AI

Dr Jennifer Cearn is a leading voice on how AI is reshaping human relationships. An AI Anthropologist and Lecturer in AI at the University of Manchester, her TED talk How AI Makes Us More Human explores what generative AI is doing to intimacy, love, and grief.

SPEAKING TOPICS:

- **AI and human relationships** — companionship, intimacy, and what we outsource to machines
- **What AI reveals about being human** — anthropology as a lens on artificial intelligence
- **Grief technology** — AI, memory, and maintaining connections with the dead
- **AI in therapy and mental health** — the promise and the risk of algorithmic care
